Contact Angie at metzdds@yahoo.com or 614-252-4444.

Mr. Rogan uses the Metz Lion Breathers dental sports orthotic which optimizes athletic performance by increasing the blood oxygen level and lowering the heart rate.

"When I tried your Lion Breathers, I didn't think they would make all that much of a difference. One night at a time, I started getting more sleep. Then I started getting better sleep. I would wake up in the morning actually excited about my day of training and preparing for the Olympic Games.

Now, I think your Lion Breathers aren't just a sleeping beauty, they also enhance my breathing when I am awake. When I compete, I get more air. When I am exhausted, I recover faster. When I need to fill my lungs, I can do so with joy. When I feel like I need to scream, I can roar!"

Dentists and their staff play a vital role in the team approach to screening and treatment of Obstructive Sleep Apnea - a condition that affects as many as 100 million Americans. But fewer than 10 percent of the nation's dentists incorporate advanced sleep dentistry into their general practices.

Thousands of dentists are missing an ideal opportunity to help their patients sleep better and live fuller, healthier lives, while adding an ideal revenue stream to their practices.

If you have been thinking about getting into dental sleep medicine, this two-day course for dentists and staff is the right choice. No hype. Nothing to sell you. Just an incredible learning experience presented by one of the nation's leading sleep dentistry practitioners, *Dr. James E. Metz, of The Metz Center for Advanced Sleep Dentistry.*

Our goal is to get you up and running the very next day.
